## FEEDBACK

The FEEDBACK group was founded in September 1999 and performs their own instrumental music, which is a blend of rock, blues and jazz. The influence of jazz can be felt more strongly. Their instruments come from the 70s, which is reflected in their sound. Their music reflects their own feelings, the consequence of which are lively and playful songs. Together, they create music based on improvisation and experiences. They perform a unique style of music which they have formed through the years. Today they have two studio album

releases (Feedback, Od blizu), and waiting for the third one to come along this year!

(Drobljenec)
